

The Eickhoff Group

The Eickhoff Group

Welcome to the Eickhoff Group!

The name of Eickhoff stands for quality, experience, reliability – and for close co-operation with our customers.

Most advanced technologies are our prerequisites for manufacturing first-class products in a cost-effective way. Innovative thinking combined with provident action assure our competitive edge. Our high-performance teams within the Eickhoff

Group are dedicated to the principle: Short ways are economical ways. We offer our customers everything from one hand – from single components via major units through to complete installations.

The Eickhoff Group employs more than 1300 people. Its principal place of business, with the main factory and headquarters covering a total area of over 100 000 square meters, is located in Bochum.

Eickhoff Giesserei GmbH

Eickhoff Giesserei GmbH is a producer of highly sophisticated batch and one-off castings.

Our core competence is the production of castings which mainly find their application in the following fields: Mechanical engineering, hydraulic engineering, power transmission engineering, fitting and pump engineering, mining and plastics manufacturing machinery, wear protection technique.

With our experts using state-of-the-art manufacturing facilities, we yield a monthly production of 1200 tonnes. The heaviest single unit mass is 5000 kgs.

Our wide material range includes over 60 different grades as well as special materials which are highly resistant to heat, wear and corrosion

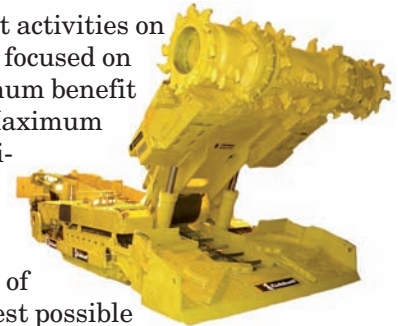

Eickhoff Bergbautechnik GmbH

Eickhoff Bergbautechnik GmbH develops, constructs and supplies high-performance machinery to the underground mining industry.

Our product line ranges from shearer loaders for longwalling via continuous miners for heading and room-and-pillar mining through to roadheaders for mining and tunnelling.

All our development activities on these machines are focused on achieving the optimum benefit for the customer. Maximum availability and reliability, ease of maintenance and long service life are distinctive features of our products. Highest possible installed powers assure our customers high productivity at low machine-specific mining cost.

Gebr. Eickhoff Maschinenfabrik u. Eisengiesserei GmbH

Gebr. Eickhoff Maschinenfabrik u. Eisengiesserei as the holding company performs the following service functions for the five operating companies: Financing, accounting, materials management, human resources.

Short ways and high quality standards also apply to our in-house services: The essential objective is to transform synergy potentials within the administrative department into cost benefits for our customers.

Eickhoff Maschinenfabrik GmbH

Eickhoff Maschinenfabrik GmbH manufactures, within the Eickhoff Group, the mechanical components for products of Eickhoff Antriebstechnik and Eickhoff Bergbautechnik. Being equipped with state-of-the-art machining centres for complex components and most advanced machines for manufacturing high-grade toothings, we are geared to meet the highest of quality standards.

Eickhoff Antriebstechnik GmbH

Eickhoff Antriebstechnik GmbH develops and constructs branch-tailored gearboxes under incorporation of specific customers' requirements. Our core competence is the realization of power transmission solutions for all types of industries. To this end we adopt the most novel methods available for computation, manufacturing technology, quality control and measuring technique on our test stands and at our customers' premises. Long service life, smooth operation and low noise emission are the distinctive features of our gearboxes. The product line ranges from drive systems for sluices and weirs via helical and planetary gearboxes with torques from 70 000 Nm onwards through to gearbox diagnostics systems. These systems, when remotely (online) monitored or used in the field, provide our service engineers with valuable detail information. With our gearboxes for wind turbine plants, we have established ourselves as one of the leading suppliers in the world market.

Our new manufacturing factory in Dresden is specialised in the series production of large wind turbine gearboxes.

Schalke Eisenhütte Maschinenfabrik GmbH

Schalke Eisenhütte Maschinenfabrik GmbH offers system solutions for coke oven machinery and rail vehicles.

In the field of coking oven machinery, we are the world's technology leader in emission protection and productivity increase. With our high levels of automation, we provide for economic coke production, user-friendly systems and high plant safety. The rail vehicles constructed here are tailor-made for even the most onerous operating conditions. Our locomotives are in worldwide service in underground and surface mines, and used for specific tasks on tram networks.

We assure our customers high flexibility, minimised interfaces, short delivery times and reliable service.
