

Eickhoff experience has no substitute

Shearer Loader SL 300

The Eickhoff SL 300 was first introduced back in 1995 as the shearer loader for low to mid seam applications. At that time the machine was originally equipped with two 220 kW cutter motors and two 35 kW DC haulage motors.

Nowadays the Eickhoff SL 300 is equipped with two 480 kW cutter and two 90 kW AC haulage motors due to Eickhoff's consequent product development.

Even though the cutter and haulage motor power has meanwhile been more than doubled, the original basic machine concept remained unchanged. This is due to latest technology of manufacturing for Eickhoff gears and the availability of smaller electrical components specially designed and ruggedized for mining applications.

The Eickhoff SL 300 has achieved production outputs of 600,000 t/month in high demand operations in the USA and Australia.

Technical Details

| | |
|-----------------------------|----------------|
| Operating Range | 1,6 - 4,0 m |
| Voltage / Frequency | 3300 V / 50 Hz |
| Total Installed Power | 1158 kW |
| Cutting Drum Speed | 46 - 56 rpm |
| Max. Haulage Speed | 40 m/min |
| Total Weight | 40 - 55 t |
