

Shearer Loader SL 300 L

This new machine concept is based on the proven principle of high power density combined with reliability and user-friendliness in control and maintenance that has been inherent to Eickhoff products for many decades and enables today's miners to extract even the thinnest seam thicknesses in a cost-effective manner.

A high degree of user and maintenance friendliness plays an important role in this market segment. Prepared with cutting edge automation concepts for remotely controlled operation alongside a sophisticated construction concept, the Eickhoff SL 300 L offers the highest availability rates while requiring only very short periods of maintenance.

The Eickhoff SL 300 L, coming with innovative control and automation technology in combination with two powerful 300 kW cutter motors which are housed in a machine body of just 75 cm in height, is a novelty in high-performance thin seam mining for seam thicknesses ranging from 1.2 to 1.8 m.

Technical Details

Operating Range	1,2 - 1,8 m
Voltage / Frequency	1000 - 3300 V / 50 Hz
Total Installed Power	690 kW
Cutting Drum Speed	45 - 62 rpm
Max. Haulage Speed	25 m/min
Total Weight	35 - 40 t
